### Constructions

Using a compass and a straightedge complete the following. Do not measure with a ruler or a protractor.

1. Find the midpoint of each line segment.

2. Find the angle bisector for each angle.

3. Find the line that is perpendicular to line L and goes through point P.

P

P

4. Find a line that is parallel to line L.

5. Copy the line segments.

6. Copy the angles.
